

PRODUCT OVERVIEW

AMX USER INTERFACES

User Interface Solutions from the Leader in Control

For over 30 years, AMX has been a leading provider of control system solutions. The key to an intuitive control system is the user interface and AMX provides a wide selection of sizes and styles to fit any application. Modero G5 Touch Panels have an elegant industrial design with fully customizable control interfaces enabling intuitive user selections that greatly simplify complicated technology interactions. ControlPads and Keypads deliver room automation experiences in a traditional, user-friendly package. Apps from TPCControl transform mobile devices or PCs into fully functional touch panels for situations when a dedicated touch panel is not suitable. Together, these technologies create a portfolio of user interfaces capable of enhancing any environment.

WE INVENTED THE CONTROL PANEL. AMX invented the world's first touch panel dedicated to room automation in 1988 and has led control panel innovation ever since. Today, AMX control panels are used in the top corporate, government, and education spaces in the world. That's why you can trust AMX to automate your environment, making it more effective and efficient.

MORE SECURE. Facilities around the world place their trust in the industry-leading security of AMX control systems. The NX and Modero platforms include the same enhanced cybersecurity features found in leading IT technologies.

SINGLE POINT OF CONTROL. A control panel integrates all the functionality you need into a single interface. Streamline meeting spaces, classrooms, briefing rooms, auditoriums and more with intuitive user selections that get complicated technology interactions out of the way.

QUICKLY FIND AND SCHEDULE AVAILABLE ROOMS. Acendo Book directly integrates and synchronizes with the most popular scheduling platforms and, through a highly intuitive, easy to use interface, enables rooms to be located and booked quickly and easily.

A LOOK THAT COMPLEMENTS YOUR BRAND. One of the first things someone will notice when coming into your facility is the device you use to control the technology in the room. A beautifully designed control panel is sure to make the perfect first impression on your client.

MODERO G5 TOUCH PANELS

Available as 20" tabletop and 10" or 7" tabletop or wall mount models, the new AMX Modero G5 Series touch panels allow users to control their environments via a beautiful interface that is now more affordable than ever. Modero G5 is built for usability, offering edge-to-edge capacitive touch glass with multi-touch capabilities. A Quad-Core processor provides fast and smooth animations and transitions and provides more than enough processing power to run the most demanding applications today and in the future. For added flexibility, a Modero G5 panel can be deployed as a control panel or as an Acendo Book scheduling panel using a built-in configuration tool - no additional software, programming or cost is required.

ACENDO BOOK SCHEDULING PANELS

Acendo Book Touch Panels are standalone scheduling panels that integrate directly with popular room scheduling software like Microsoft Exchange, Office 365, and Google Calendar without additional system hardware requirements. Available in 10" and 7" models with a wide variety of mounting options, Acendo Book is ideal for businesses of all sizes wishing to optimize room utilization by implementing facility-wide room scheduling. For added flexibility, a Modero G5 panel can be deployed as an Acendo Book scheduling panel or as a control panel using a built-in configuration tool - no additional software, programming or cost is required.

MASSIO CONTROLPADS

ControlPads combine AMX NX controller technology and a stylish keypad into a single unit to provide dedicated room control. Massio ControlPads provide high performance, intuitive usability and modern styling, and are simple to configure using AMX's Rapid Project Maker or custom programmed using NetLinX Studio software.

MASSIO AND METREAU KEYPADS

Keypads are simple control interfaces that allow you to interact with all the technology in your room via intuitive and tactile buttons. A single button press can initiate a macro that can set all the technology in your room to a single preset. AMX makes keypads in a variety of looks, colors, and button arrangements.

TOUCH PANEL CONTROL

TPControl enables Apple iOS, Android, or Windows devices to transform into fully functional touch panels for controlling AMX system platforms. Licenses are available for single devices or BYOD environments and are easily administered with the TPControl management portal.

TPC-TPI-PRO

The TPC-TPI-PRO In-room Presentation Management System enables users to preview multiple video sources and control their presentation and presentation environment from a single, third-party touch panel interface, running on any Windows 8.1 PC or above. It is ideal for supporting legal, healthcare, higher education, network operating center (NOC) and other applications requiring simple, effective and efficient presentation management.
