

Samsung Flip with Cisco Webex Room Kit Mini

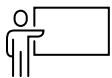

Experience work transformation. Today.

In today's fast-paced business world, collaboration is the key to success. To help with your success, industry leaders Samsung and Cisco have come together to transform collaboration by transforming the modern workplace with Webex on Flip. Leading Samsung signage technology combined with Cisco's innovative Webex collaboration platform provide a seamless, integrated meeting experience.

Interactive features make the Samsung Flip a powerful collaboration tool anytime, anywhere. And when combined with Cisco's leading video conferencing technology, people can come together like never before, whether in a meeting room or working remotely from multiple locations.

Key highlights

Flexible utilization of both video conferencing and digital flipchart

More productive and engaging collaboration in any business setting to get things done

Integrates with Webex Teams to support a better workflow

Useful features for whiteboarding, including pen-to-paper-like writing experience and various edit tools

Smoother video conferencing through crystal-clear audio and detailed picture quality

Ability to share and source content from multiple connected devices

The Webex on Flip integrated meeting solution

By combining Samsung's industry-best visual display technologies with Cisco's market-leading video collaboration solutions, Samsung and Cisco are transforming the modern meeting space. With convenient and intuitive operation, Samsung and Cisco offer a comprehensive suite of features that upgrades every meeting

environment through the use of a digital flipchart. Webex on Flip unites Samsung's innovative interactive digital flipchart technology with Cisco's advanced meeting solution, to enable more accessible meetings and creative collaboration.

Flip 55"

Webex Room Kit Mini

The Samsung Flip digital flipchart

Samsung Flip is an intuitive and easy-to-use digital flipchart, designed to enhance any meeting environment. It offers enhanced collaboration in an easy UI, with a host of features and tools. Meetings are made more productive through simple notation modes, flexible image editing, comprehensive connectivity options and screen sharing capability. Teams can work smarter, faster and better.

Flip 65"

Flip 55"

Features

Pen and paper annotation

InGlass technology ensures smooth and familiar pen-to-paper-like writing with no delay. Users can easily erase drawings with a finger or palm swipe.

Convenience

Versatile embedded templates, as well as a document viewer that doesn't require an additional PC, enables effortless presentations supported by any web browser.

Intuitive usability

Write on any source material without affecting previous work layers. Scroll through up to 20 pages and merge any image to the roll at the click of a button.

Powerful connectivity

USB, HDMI, NFC and screen mirroring capabilities offer versatile connectivity, along with screen sharing and meeting recap distribution.

The Cisco Webex Room Kit Mini video conferencing device

The Cisco Webex Room Kit Mini is a compact video conferencing and collaboration device optimized for huddle space and small meeting rooms. Combined with a flat-panel display, it brings people together to collaborate across any distance. Equipped with multiple sensors and AI-powered features, Cisco Webex Room Kit Mini provides intelligent ease of use. You can focus on your meeting, whether it's to share a presentation, join an audio or video conference, or create content with team members in the room or remotely. Combined with the Webex Teams application, you can easily move your meeting between your personal device and the Room Kit Mini, for an optimized huddle space experience.

Features

Smart meetings

Intelligent camera and audio solutions ensure optimal framing with high-quality video and suppressed background noises for pristine audio.

Smart integrations

Monitor meeting space utilization, and integrate with other office resources for a better workplace experience.

Smart presentations

Support for 4K content and both wired and wireless sharing makes for effective presentations.

Access to Webex service

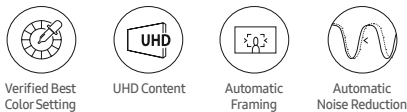

Through Webex Room Kit Mini, you can access Webex Calling, Webex Meetings, Webex Board whiteboard service, Webex Teams spaces, Remote Management and Room Utilization analytics.

Take team collaboration to the next level

Together, Samsung Flip and Cisco Webex provide businesses with optimal meeting room solutions for a connected and collaborative experience like never before. With Webex on Flip, all users will have a smooth conference experience in crisp, detailed clarity. With a focus on collaboration, Webex on Flip allows multiple meeting participants to share the screen in real-time to create the most efficient meetings possible.

Perfect video conferencing solution

Cisco's Webex Room Kit Mini provides an optimized meeting experience through innovative video and audio-conferencing features. AI-powered capabilities offer more efficient communication by automatically positioning the faces of meeting participants in the center of the screen, while background noise suppression ensures a smooth video conference experience with no delay.

Multi-way collaboration

Webex on Flip enables real-time, two-way whiteboarding, allowing meeting participants in different locations to share the same screen and make edits. Users can utilize the annotation tool and delete or add content all at the same time, creating more efficient and collaborative meetings.

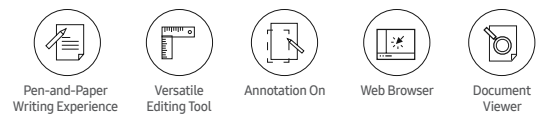

Wireless presentation

Webex on Flip allows users to utilize their own laptop or mobile device with a wireless connection to easily share content to the Flip whiteboard, without the need for any additional hardware.

Best-in-class digital flipchart

The Samsung Flip has a host of innovative features to meet the needs of any meeting environment. Users can enjoy a smooth pen-to-paper-like writing experience, and easily change content with the editing and annotation tools. Users can access a web browser directly on the Flip without any additional device required, and a document viewer adds easy functionality.
