Multi-Focus Framing

REAL-TIME FRAMING

Real-time Auto Framing

Meeting Room

A20 Recording

PRECISE.

There are no jumping pictures, and the camera doesn't need to search people from time to time. Everyone in the meeting room is always on track precisely.

REAL-TIME.

Different from traditional auto framing, the camera of the MeetingBar frames and track people, providing a real-time scene in the meeting room.

Multi-Focus Framing

Meeting Room

A20 Recording

DIVERSE TRACKING

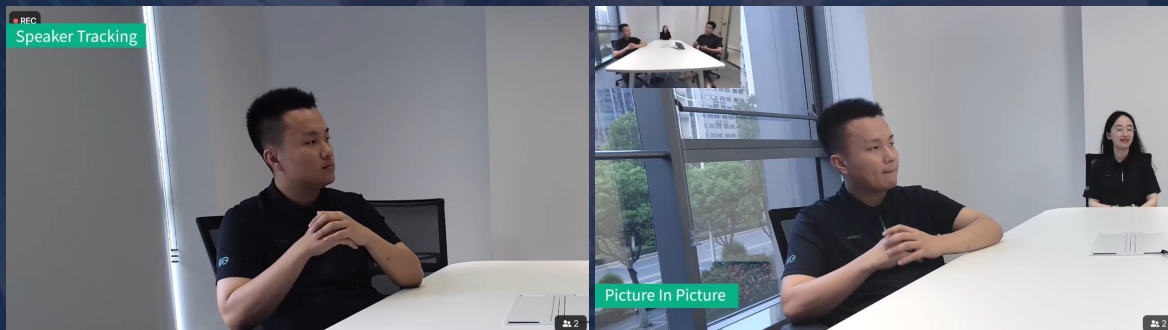

PRECISE.

The camera detects the speaker quickly and frame on the speaker precisely.

DIVERSE.

Except for traditional speaker tracking, MeetingBar also offers other tracking options: conversation mode for better view over conversations, and Picture-in-Picture mode for additional panoramic view of the meeting room.

SMOOTH.

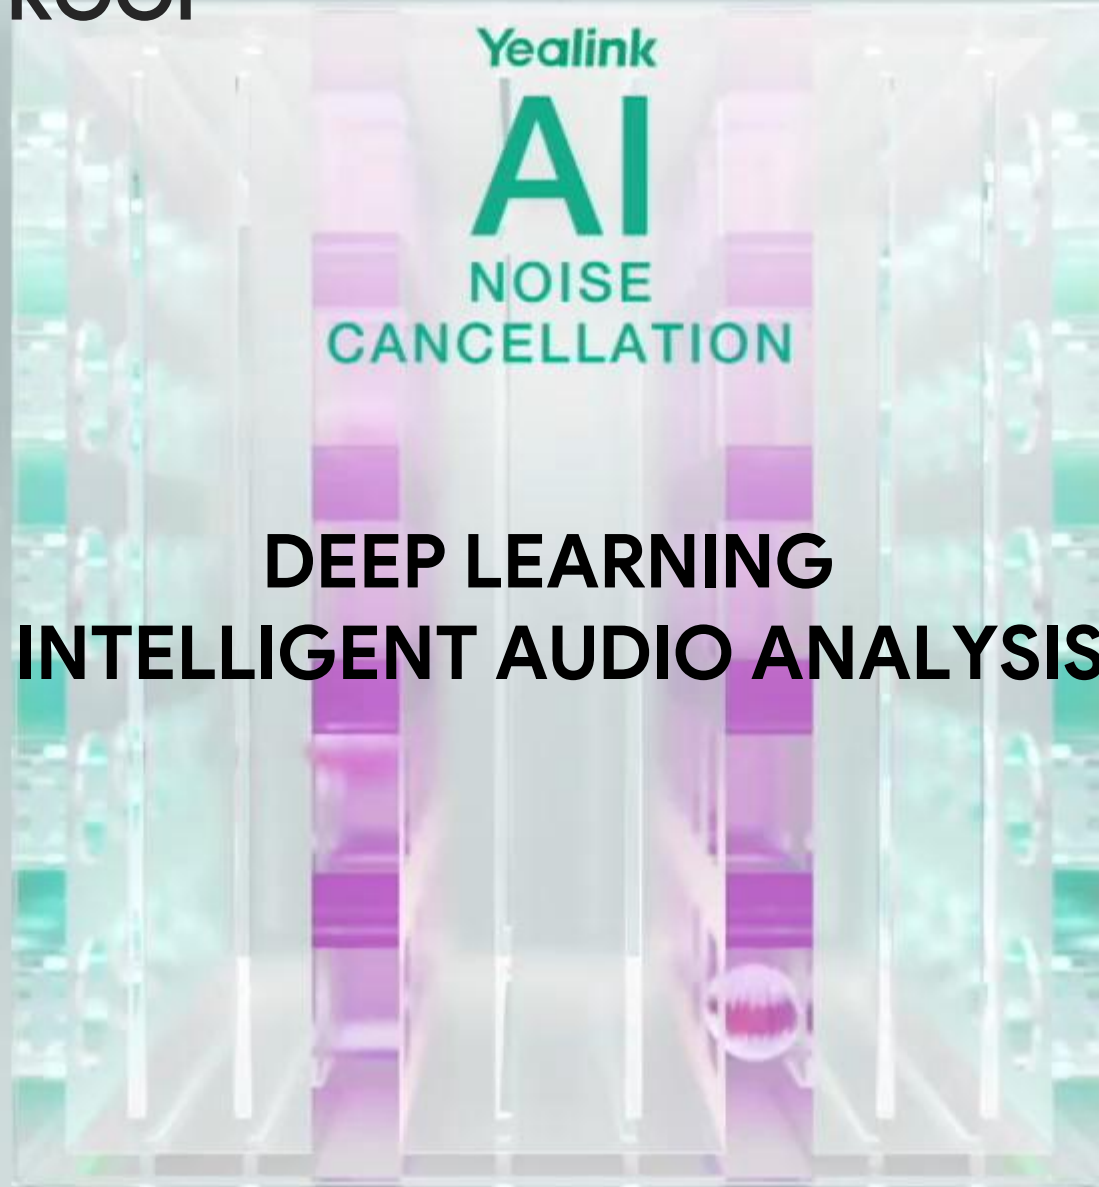

One frame dissolves naturally into another when changing frames, creating a smooth video experience.

EVERY ONE GETS HEARD COVER MEDIUM SPACE

New Wireless BYOD Device

All-in-One Design — Easy to deploy and manage

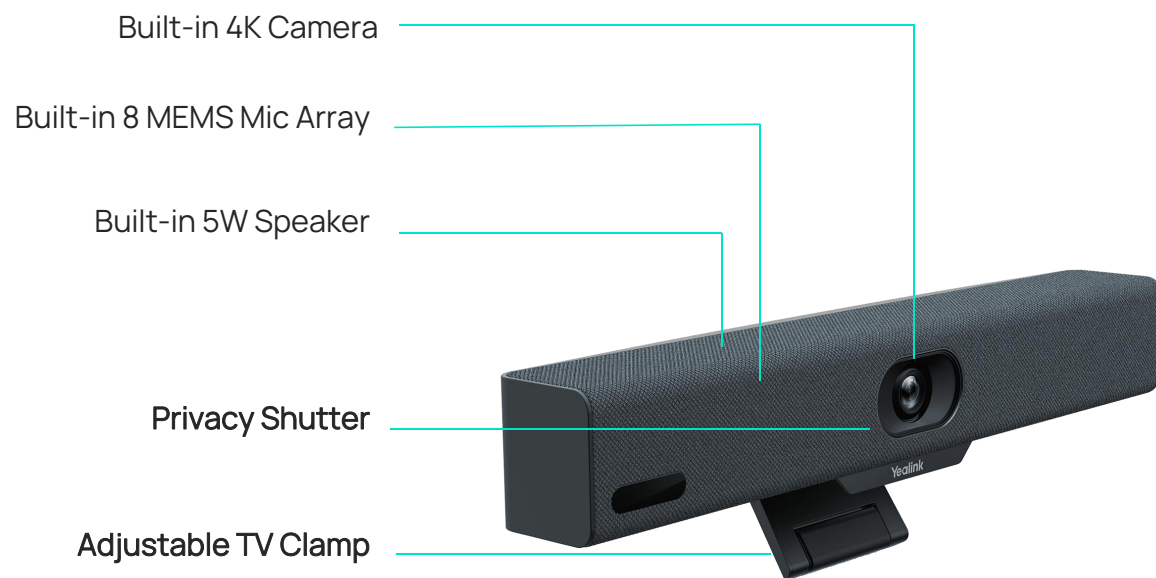

Meetingbar A10

A10 Specification Overview

All-in-one compact design fits MeetingBar A10 in all kinds of small spaces: on the TV, on the wall or even on a monitor. You can set up within minutes and kick off a meeting in seconds.

All-in-one Design

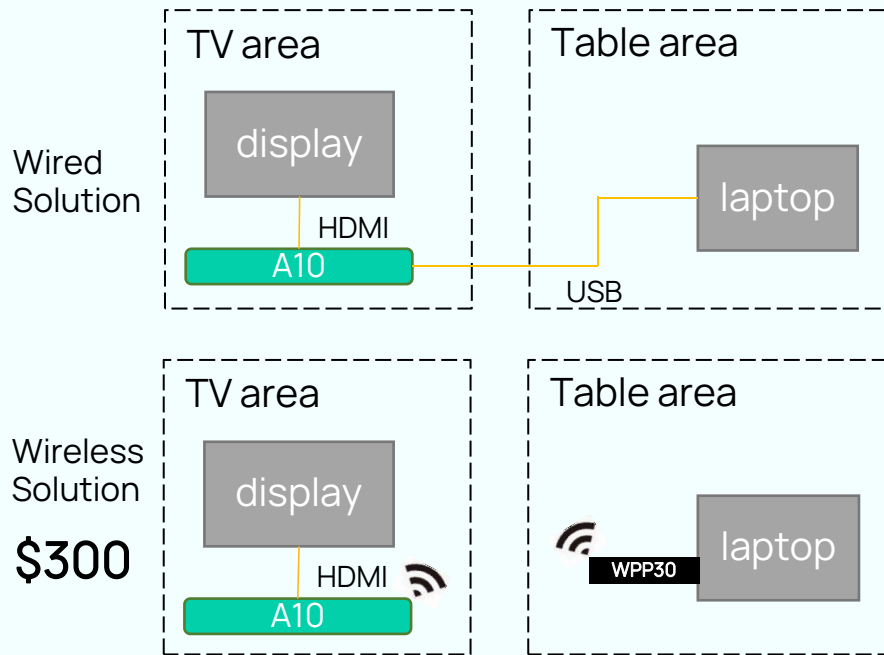

Resolution	8MP, 4K 30 fps
Field of View	120° DFoV, 105° HFoV
Zoom	4x ePTZ
Privacy Shutter	Electric Lens Cap
Microphone	Built-in 8 MEMS microphone array
Voice Pick-up Range	4 meters
Speaker	Built-in 5 W high fidelity speaker
	Yealink Noise Proof Technology
	Full-duplex
Audio Features	Echo cancellation
	Audio Fence
	Auto Framing
	Speaker Tracking
Camera AI Features	Smart Gallery (Zoom Only)
	Video Fence
	Multi-Focus

Wireless sharing and BYOD solution

MeetingBar A10 has its own wired sharing and wired BYOD solution, and also support wireless sharing and BYOD via WPP30, no need third party peripheral.

WPP30 is easier deployment than Barco, and also support 4K 30fps video transmission, but only 1/7 price of barco

Reverberation Suppression

Built-In Two-Way
Microphone

Intelligent
Noise Reduction

Yealink enhanced AI noise cancellation makes the audio experience more brilliant. Leveraging a massive deep-learning sound database to reduce background noises, it is more about intelligent audio analysis than standard filtering of audio frequencies. The distracting keyboard clatter, mouse clicks, footsteps, and other ambient noises are smartly pared back, ensuring that users enjoy crystal-clear audio quality.
